

### Sizing methods!

- (1) Make sure that your computer is copying at 100%. Place a ring that fits your selected finger and compare it for size by placing it on top of the appropriate circle below.
- (2) Measure snugly around the largest knuckle of the selected finger with a string or narrow strip of paper, and laying the string or paper out flat measure the length and compare to the chart below for size.
- (3) If you have access to ring sizers, this would definitely be the best method of measuring. Checking more than one way is suggested. When in doubt select the next larger size.
